

SBS team helps to open state-of-the-art facility in Sussex countryside

“We have always had a positive experience working with all of the teams within SBS. Each SBS employee that we have worked with represents a specific ethos which spreads through the company. We have overcome many challenges together and SBS are always finding solutions.”

Treehouse Educare

Service Desk support

The SBS Service Desks are staffed by specialist teams who can swiftly provide support for each core service. During and after the build, the Service Desk is New Barn’s helpline for important technical issues or when carrying out daily tasks, such as managing Office 365 accounts or SIMS processes and installing critical software updates.

“The SBS Service Desk is phenomenal. The team are responsive, won’t hold you up on the phone and provide rapid solutions to everyday challenges.”

Procurement

Key to allocating a budget for a new school project, we advised on the latest and best value hardware and software. For New Barn’s opening, we supplied equipment for the ICT suite and laptops for all staff. Cost-effective licensing for eSafety, online backup and internet filtering solutions were installed to secure the school’s ICT.

“As expert advisors, SBS understands the evolving nature of education and legislation, allowing us to make confident decisions about where we allocate our project budget.”
